FOR IMMEDIATE RELEASE

OVERHEAD DOOR LAUNCHES NEW DESIGN IN ITS POPULAR THERMACORE® COLLECTION *New Model 192 V10 Increases Garage Door Style Offerings for Homes*

LEWISVILLE, TEXAS (March 30, 2015) – Earlier this month, Overhead Door, the inventor of the upward-lifting garage door, announced the latest design in its popular Thermacore® Collection. The Model 192 V10 allows local Overhead Door distributors to remain competitive with another garage door solution, expanding their industry offerings.

The Model 192 V10 embossment comes in the existing Thermacore Collection colors and finishes and is available with the wind load offerings within the current 190 series. The wainscoting design is a centuries-old marriage of form and style, adding an upscale look at an affordable price.

“With five designs, nine colors and two finishes, and a variety of window styles, the Model 192 V10 is everything a homeowner could want in a door,” said Mark Sawicki, residential product manager for Overhead Door. “The new long panel design allows another choice for our distributors to offer customers, keeping them competitive in the industry.”

A garage door can enhance the overall look and feel of a home, and homeowners can be confident when outfitting their homes with Thermacore insulated steel garage doors. Specifically designed to reduce air filtration, Thermacore doors can help maintain thermal efficiency in both hot and cold weather climates.

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of doors and openers for residential, commercial, industrial and transportation applications. The company has five divisions: Access Systems Division (ASD), which features the Overhead Door and Wayne Dalton brands; The Genie Company, manufacturer of remote-controlled garage door opening systems; Horton Automatics, a manufacturer of automatic entrance systems; TODCO, the largest producer of truck doors for the transportation industry; and Creative Door Services, Western Canada’s leader in providing door products and services to the residential, commercial and industrial markets. Overhead Door Corporation created the original overhead garage door in 1921 and the first electric garage door opener in 1926. Overhead Door now employs more than 3,500 people, has 22 manufacturing facilities, 78 regional sales and service and installation centers and more than 5,000 distributors and dealers that service national builders, national accounts, architects, general contractors and homeowners, as well as major retailers in the U.S. and Canada. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan.
